

# AI MEC Token – AIMEMECHAIN: Locks Overview

## Transparency and Commitment to Investors

At AIMEMECHAIN, we prioritize transparency and investor trust. To ensure long-term stability and community confidence, we have implemented clear token lock and vesting mechanisms. All AI MEC tokens and liquidity are locked with publicly verifiable details, ensuring that no tokens will be unlocked prematurely.

Our token lock schedule, along with liquidity pool locks, is made available through transparent third-party platforms like Pinksale, offering full visibility to our investors. With clear unlock timelines and locked amounts, we demonstrate our dedication to a sustainable and secure ecosystem for the AIMEMECHAIN project.

This approach reflects our commitment to fostering long-term growth, supporting the community, and maintaining fairness across the project's development.
